

2/6/70

Dear Sylvia

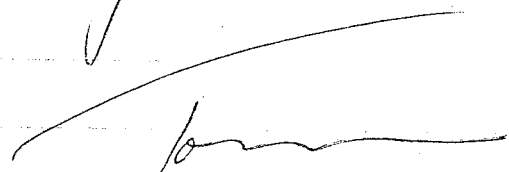

Your pardon for delay in communicating with you. Business pressure and minor illnesses put me off. While waiting my turn in a doctor's office my eye lit on the American Rifleman. Old memories stirred and I riffled its pages. My eye caught Gen. Marshall's article on page 26. Its contents were striking. Although it may not have been his purpose, he massed data which by implication suggests the military "body counts" in So. Vietnam are fraudulent, air bombardment is largely ineffective militarily and the entire military enterprise in that country is a fiasco.

Then I came upon Davidson's piece on page 60:

Analyzing Shooting Accuracy. My eyes opened wide. Here is information with revelatory bearing on the testimony of the ballistics experts who contributed to the misreading of the evidence in the assassination of JFK. As soon as time permits after you return the magazine I intend to review Frazier's testimony and that of the other experts in the light of this article.

I am anxious to know what you think of the data in Davidson's piece.

Yours
