Mrs. Sylvia Meagher
302 West 12th Street
New York, N. Y. 10014

My dear Mrs. Meagher:

If I hadn't been convinced of it before, your very kind letter of the 6th giving me the references to Lee Harvey Oswald's childhood for a third party, whose interests you do not share, is absolute proof that you are the very finest woman I have never ~~met~~ met and just about the most marvellous friend I have never had.

Knowing how busy you are professionally and private^{ly} and of your vast correspondence I thank you for your trouble to send me references from your own work especially about a phase of the story which many people & you think is invalid.

I am so glad to know that your Subject Index is again available in xerographic form, and that is again why you are so wonderful in not obliging me to go to the source. There just aren't many people like you.

~~I hope~~ ^A after reading all this source material I hope ^{my} ~~my~~ psychologist can contribute something of interest. I shall give her your caveat about the number of responsible people who dispute the presumptions that Oswald either planned or carried out the assassination. (Sometimes people who are unaware of the body of research with which you are associated are absolutely unaware of the very grave question that he either acted alone or in concert.)

~~I wish~~ I wish there were some favor I could do you for your kindness -- but one day I shall do myself the favor of reading more deeply into the whole subject (my tour with the newspaper was really just nonsense and absolutely superficial).

With many thanks and kindest regards, I am

Yours faithfully,

T. G. P. Cann
