Dear Ms. Meagher,

I was given your address by Bob Cutler, a researcher into the JFK assassination, who lives nearby in Manchester, Mass. I have worked with Ed Berkley of "Computers and Automation" and Dick Sprague. I drop these names to try in a small way to overcome the apprehension you must have when a stranger asks you of your work.

I am a journalist here in Boston and am trying to compile an article on the research that has been done into the JFK assassination since the publication of the Warren Report. I would appreciate it if you could reply as soon as possible in writing, and I will then follow-up with a phone call to ask further questions.

First, of course, I would like to know if you are still actively doing research. If so, what is it and what has it revealed? What has been the nature and results of the research you have done since the Warren Report? Is there much new evidence yet to be uncovered?

Next, I would like to know what these investigations have meant to your personal life. Hassles? Complications? Frustrations? How do you keep going in the face of the general cynicism about the subject? How much time do you or have you put into your research? Do you believe the truth will ever be known in a large-scale way?

I would greatly appreciate hearing from you soon, so I might complete this by Nov. 22, unfortunately the only time when this subject is marketable.

Thanks and good luck,

Bob Katz
