

1-29-75

Dear Mrs Meagher

You mustn't get sick.

I feel I owe you. So I send you some pages out of the middle of a book by Dr Max Gerson. The book is on the subject of cancer, a field in which he was 50 years ahead of his time - perhaps 75 years ahead. His treatment consisted largely of diet. I do not send you this because I think maybe you have-had cancer, but because the diet applies to MANY illnesses, and conceivably if you adopted it, and adapted it to your own physique, it would make you so well you'd find you can't resist working on writing - whether the assassination or anything else - because you feel so healthy. At least that is my hope. I also enclose a little book telling the story of the doctor - Gerson. I buy them 24 at a time and give them to people I think might be interested - in the doctor, in the treatment, in the story, whatever. In any event, enjoy it - and GET WELL, HEAR!?

If you feel too bad, don't worry about answering.

Oh - I called Q M Dabney (their phone 202-423-9077). They're out of Accessoræes, but they promised me to look for a couple copies. I'll let you know.
Please don't be turned off by the subject.....

Did I tell you my mother lived on 15th St W (maybe 17th), in the same block as Hearn's is or used to be, from about 1884 till 1902 when she ran away and married my father? That's right around the corner from you....
