Dear Ms Meagher,

I wonder if you have continued working on the Kennedy Assassinations since your voluminous and valuable works, to both of which I owe a deep debt.

I have little doubt that I have broken into the Warren Report with the names of five people, who knew that shots were going to be fired on the Dealey Plaza at least half an hour before the President arrived --- and probably for much longer. The key is in that most unlikely place the Warren Report, ~~but~~ consists of no more than a couple of sentences; but those I have no doubt are unanswerable.

I do not wish to embarrass you by writing in more detail, should you still be working on the subject, and maybe have made the same discovery. ~~But if you have left the field for good, and~~ would care to see my argument, I should of course be flattered.

I should perhaps add that I spent a year in the Graduate History school at Yale, some years before the late President. You will also find my name in the Library ~~of~~ of Congress catalogue with books on Atomic Spectra and Modern Interferometers. I also spent a few days at Hyde Park during the World Youth Congress at Poughkeepsie in 1938 --- which I take it was long before your day!

As commonly happens in historical work, any success I may have had is due ~~to~~ more to luck than to merit --- one can so easily overlook a key sentence, and there are only a couple in the whole of the 27 volumes. But once seen and recognized, one soon sees that all else drops into place, and makes a consistent story.

Hoping to hear from you,

Sincerely yours,

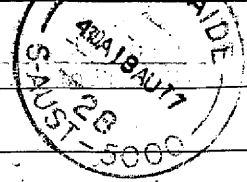

Chris Candler
