

12/11/77

Dear Sylvia,

I hope everything has been going well for you since I last wrote. I really just wanted to let you know that the reason I never sent you any clippings for the period you were away in August & Sept. is that none of the papers I had access to contained a single article the entire time. As I'm sure you know, the House Committee has just about gone underground to avoid the media. The recent release of FBI documents was the first bit of news on any of the assassinations in the local papers in quite sometime. I'm excited about the release of the documents & can hardly wait to read them, although I don't know when I'll be able to. Harold has been getting documents from the FBI on the King assassination for several months. A lot of information has been cut out of them that should not have been because it's already been written about elsewhere, so I put together an index of names, places etc. from several books so that Harold & Jim

Lesar can determine the FBI's compliance  
in handing over everything they should.  
Unfortunately, I haven't been able to get away  
long enough to read through even those  
documents, so I have an awful lot of  
reading to catch up on.

I read your letter on the Garrison  
iasco in Penn Jones: Continuing Inquiry. It's  
encouraging to hear one of the most respected  
critics speak out openly against Garrison's mockery  
of justice. I have always felt that Garrison's  
"investigation" was responsible for burying the truth  
even deeper & for driving many responsible  
researchers & investigators underground. People  
presently involved in any serious research  
are still trying to overcome the bad reputation  
given them by Garrison. Like any responsible  
person studying UFOs, the publicity given to the  
nuts & fanatics makes it very difficult for such  
a person to achieve credibility. Since the  
nuts seem to outnumber the responsible  
researchers, I wonder if will ever uncover  
the truth.

Take care & Best wishes for the  
holidays & the New Year.

Karen
