

Dear Mrs. Meagher,

of all of the books that I have read on the Warren Commission's fairy tale, I would have to say that Accessories After The Fact is the most Managing book on the report.

I truly thank you for taking<sup>th</sup> painstaking time to review the Report & its 26 volumes of "evidence" and testimony.

Although I am only 19 years old I'm proud to say that I am a critic who does not wish to be blinded by lies such as the "single-bullet theory" and "newspaper". I have collected much photographic evidence on the Kennedy assassination, including 3 films and almost 150 different slides. I believe that at least 3 gunmen were firing at JFK, and I feel very strongly that Oswald was framed.

The reason I believe this is single - because you and authors like you have taken the time to bring to light the true story of that day in Dealey Plaza. Anyway - there are two questions that I would like to ask you, as you are probably

the most qualified to help.

Number one concerns some of the Warren Commission's tests to "verify" the single-bullet theory. We are all well aware of the bullets which were fired into corpses' wrists in order to simulate Governor Connally's wrist wound. My question is - exactly how many bullets were fired in corpses' wrists? I believe that I once heard that the test was run 250 <sup>times</sup> but I don't remember for sure.

Too, I have read in Robert Cutler's book The Umbrella Man that a witness saw someone, an F.B.I. type, controlling the loading docks of the Texas School Book Depository at the time of the killing. This witness was on Houston St. I believe. I wonder if you could fill me in on the details. Mr. Cutler says that the story is in the volumes somewhere, but he can't remember; so he referred me to you.

Unfortunately time doesn't permit me to ask every question that I would like to ask. But I've been trying to find answers to many questions about JFK's murder, and most of them I may never know - such as who

really killed Kennedy, and why?  
Anyway I want to thank you  
once again for your sensational  
book. It truly blows holes  
in the report. And I wonder if  
you might consider reissuing your  
index to the report. My college  
has the Report & all 26 volumes,  
except, when I go to look up  
certain points, I have no guide  
of any kind. So possibly you would  
consider this. Thank you!

Very Respectfully Yours,

Roy E. Weaver
