Dear Ms Meagher,

You will long ago have forgotten that you were kind enough to write to me some five years ago, when I first started studying the Kennedy Assassinations.

However, when one has retired, one had plenty of time, if not much else.. The title of the book is

THE KILLING OF THE KENNEDYS

All the chapters are in draft, and about half of them are complete with the references in the text. There seems little doubt that the President was murdered by a tripartite conspiracy, consisting of a Texan Cabal, the Mafia and the OGPU. But only one assassin can be named -- Larry Crafard -- He was probably in the Dal-Tex Building with Jim Brading in attendance.

If you know of any publisher who might be interested, I would gladly have have photopies made of a dozen chapters, so that he may form an opinion.

As evidence of good faith, I should perhaps add that six bullets were fired on Dealey Plaza, two from the overpass ahead, two from the Dal-Tex Building behind, and two from the bushes on the right. Moreover the last two were soft-nosed. --- Something only Weisberg seems to have suspected.

I have books on Atomic Spectra and Modern Interferometers to my name, but this is my first attempt to enter a more erudite field.

Sincerely yours,

Chris Candler
