Dallas Texas 75219

Dear Sylvia:

Just a note to sort of go along with the Christmas card. We both hope you're okay and all that. Ted, too.

Carol Anne might glean some indication this week about the future of the White Plains project; we'll let you know as soon as we find out anything definitive. Needless to say, we both want to return to New York.

I haven't been able to keep up with things too much from these Dallas newspapers (sometimes I can buy a day-old Times) but from what I've been able to read so far, I simply don't believe that Khadafy has sent any kind of a hit squad over here to kill Reagan, Haig or any other U. S. official. It looks to me like a move by the administration to prepare American public opinion for some kind of military action against ~~Libya~~ Libya in the name of anti-communism. It may of course be the prelude to something far more drastic. With the domestic economy crumbling, the West Europeans in open revolt and the new anti-Castro policy the laughing stock of the whole world, the Reagan people may well be planning some apocalyptic theatrics to draw attention away from their absurd failures. I don't think they can push the country into war because there would be too much open rebellion on the streets at home; they might try it, though. The Democrats will surely win sweeping victories in Congress next year.

Well, as I said, this is just a note. More later. Keep in touch and say hello to Ted and Sonie for us. Dallas is fine but NY is better, that's all...

love,

Tom
