TRIALS IN COLLECTIONS: An Index to Famous Trials Throughout the World

by John M. Ross

218 pages 1983 LC 82-21635
ISBN 0-8108-1603-2 \$16.00

Librarians have long recognized the need for an index that would permit quick and easy access to trials in collections. *Trials In Collections*, an index to accounts of famous trials that are contained in 322 collections, bridges that information gap for frustrated searchers in academic, law, public and secondary school libraries. The index is especially designed for the reader who wants concise, journalistic accounts of trials rather than the extensive legal transcripts or the case reports which so often prove forbidding to the layperson. In addition to its use for locating trials, the index can also serve as a reference book in that it readily provides the highlights, or basic information, on a trial—name of the defendant, where and when the trial took place, and the offense involved.

UNITED STATES SUPREME COURT DECISIONS: An Index to Excerpts, Reprints, and Discussions—Second Edition

by Nancy Anderman Guenther

864 pages 1983 LC 82-10518
ISBN 0-8108-1578-8 \$52.50

Students in many different disciplines need information on Supreme Court decisions; e.g., a sociology student examining the abortion issue; an education student researching busing; a political science student researching the apportionment of legislatures, among others. *United States Supreme Court Decisions* will aid such students in locating reprints of major decisions in secondary sources and/or discussions of those decisions found in both monographs and periodicals.

The work is divided into five basic sections: 1) a bibliography of over 580 titles, most published between 1960 and 1980; 2) a list of over 300 periodical titles; 3) a chronological listing of the court decisions located, each with a citation, a date, and a list of the relevant secondary works; 4) an alphabetical listing of the parties involved in each case; and 5) a subject index to the topics discussed in the various cases.

"... It is impossible to overestimate this index's convenience value to students and laypersons."

—WILSON LIBRARY BULLETIN, June 1983

A review of the first edition:

"... Quicker to use than either United States Reports or the United States Supreme Court Reports, lawyer's edition, this guide is especially recommended for undergraduate students of U.S. constitutional law. However, its clarity and excellent subject index make it useful for anyone interested in the U.S. Supreme Court cases covered in the guide."

WATERGATE: An Annotated Bibliography of Sources in English, 1972-1982

by Myron J. Smith, Jr.

344 pages 1983 LC 83-4408
ISBN 0-8108-1623-7 \$22.50

The bungled break-in at the Democratic National Committee headquarters, associated crimes such as the ITT/Milk Fund, and the great debates in Congress and the courts which led to the resignation of President Richard M. Nixon in 1974 are the focus of this annotated bibliography of books, monographs, articles, documents, and reports written during the decade 1972-1982. Additional features include a biographical list of Watergate "personalities," a chronology, the history of the House Judiciary Committee impeachment inquiry together with the bills of impeachment, and a list of journals from which articles were selected. The book has two main sections: reference works and the bibliography, the whole consisting of a single numerical listing keyed to a subject index. While aimed primarily at scholars and students, the bibliography should also prove useful to librarians, general readers and journalists. It should also interest those specialized students known as "Watergate buffs."

MASTER INDEX TO THE J.F.K. ASSASSINATION INVESTIGATIONS: The Reports and Supporting Volumes of the House Select Committee on Assassinations and the Warren Commission

by Sylvia Meagher in collaboration with Gary Owens

447 pages 1980 LC 80-17494
ISBN 0-8108-1331-9 \$25.00

The *Master Index* provides indexes to the reports and the forty supporting volumes of the two major official investigations of the assassination of President John F. Kennedy—the first, by the Warren Commission in 1964, and the second, by the House Select Committee on Assassinations in 1979. These massive historical reports with their accompanying volumes of hearings and exhibits were published with little or no internal indexation. The *Master Index* fills the gap by providing a series of indexes which introduce order and enable accessibility to information in these immense bodies of evidence. It is an indispensable tool to researchers and investigators interested in the JFK assassination and to students of governmental investigatory processes.

"A must for any collection of books concerning the Kennedy assassination, it is a necessary reference volume for any reader who wants to make sense of this mass of material."

—CHOICE, January 1981

"... The Master Index to the J.F.K. Assassination Investigations should be in all large public, college, and research libraries, especially those that have copies of the Warren Commission or House Select Committee reports."

CRIMINAL INVESTIGATION: A Guide to Techniques and Solutions

by James V. Vandiver

408 pages 1983 LC 82-10554
ISBN 0-8108-1576-1 \$27.50

Criminal Investigation consolidates and organizes almost fifty years of data relating to criminal investigations. Designed to prevent duplication of previous investigative work, the volume contains condensed versions of over a thousand articles from police and related periodicals, newspapers, reports, newsletters, training bulletins, and individuals in sufficient detail for the reader to apply the concepts or know if contact with the author is worth pursuing. The contributions are grouped into categories that deal with equipment, techniques, types of physical evidence, and crimes. Relevant material as far back as the 1930's and as current as 1981 is included. A detailed index allows the reader to locate specific topics. The volume should prove useful to criminal justice practitioners and students, attorneys, mystery writers, and the libraries that serve their research needs.

LET THEM BE JUDGED: The Judicial Integration of The Deep South

by Frank T. Read and Lucy S. McGough

668 pages 1978 illus. LC 78-872
ISBN 0-8108-1118-9 \$32.50

The Supreme Court's 1954 holding in *Brown v. Board of Education* must be listed as one of America's two or three most important legal decisions. In ringing tones the Court declared unconstitutional the separate-but-equal doctrine of *Plessy v. Ferguson*, as it applied to public education. That mandate began this nation's Second Reconstruction. But, contrary to the view held by most citizens, the Supreme Court in *Brown* did not integrate the South's schools. The task of transforming the *Brown* promise into reality fell on a handful of unsuspecting and unprepared federal judges. Against a backdrop of stubborn antagonism and occasional violence, the lower federal courts in the Deep South and Border States struggled to implement *Brown's* command to integrate the public schools. As a result of their twenty year effort, the Deep South is now the nation's most integrated region. Those judges presided over a bloodless revolution in this nation's race relations. How was the task accomplished?

Let Them Be Judged: The Judicial Integration of the Deep South tells that story. Based on five years of intensive legal research, with access to previously unavailable court records and with the aid of scores of personal interviews, it traces the development of the law of desegregation as it evolved from over a thousand separate reported and unreported decisions. It is the first and only comprehensive history of the judicial desegregation of the Deep South.

"... This book ought to be read by judges, students of government, and those who wish to be called lawyer...." —American Bar Association Journal, January 1980—Vol. 66

LABOR RELATIONS AND COLLECTIVE BARGAINING: A Bibliographic Guide to Doctoral Research

by Mildred J. Fox, Jr. and Patsy Cliffene Howard

297 pages 1983 LC 83-4612
ISBN 0-8108-1632-6 \$19.50

This is a bibliographical guide to the doctoral research completed in labor relations through 1981. As one of the major research resources in the field, it will be of value to scholars and reference librarians alike in providing new research leads, helping establish the basis for replication, and pointing the way to future research.

The bibliography catalogs over 2,700 doctoral dissertations accepted by accredited, degree-granting universities in North America and abroad. Arranged alphabetically by author, it includes a comprehensive subject index and extensive cross-referencing. Some of the subjects included are decision-making, education, Fair Labor Standards Act, firefighters, garment industry, labor policy, librarians, National Labor Relations Board, nurses, police, principals, school boards, teachers, tenure, and women.

COMMUNICATION UNDER LAW

Volume I: Free Speech

307 pages 1979 LC 79-19166
ISBN 0-8108-1248-7 \$17.00

Volume II: Journalistic Freedom

by Joseph J. Hemmer, Jr.

421 pages 1980 LC 80-7960
ISBN 0-8108-1315-7 \$22.00

Communication Under Law is a two-volume work designed to analyze major issues concerning communication law. Volume I examines "free speech" topics: dissent, assembly, academic freedom, obscenity, silence and intrusion. The second volume considers questions related to "journalistic expression"; privacy, libel, copyright, fair trial, access to information, broadcast regulation, regulation of advertising. The author provides a description and analysis of major court cases which affect these issues. More than 225 cases, most of which are significant U.S. Supreme Court opinions, are considered in Volume I, and more than 250 cases are considered in Volume II. An encyclopedia of communication case law, this work may be used for reference or as a text for political science, journalism, or communication courses.

A review of Volume I:

"... a valuable reference work and provides an efficient and scholarly overview of the law of freedom of expression. It belongs on the bookshelf of every serious student of communications law...."

—QUARTERLY JOURNAL OF SPEECH,
November 1981

About Volume II:

"... The briefs are clearly written and generally reliable in their analysis of the cases. They should prove valuable to students of constitutional law and especially valuable to students in communications majors.... Recommended for all undergraduate libraries and for larger public libraries."

CONTEMPORARY LITERARY CENSORSHIP: The Case History of Bur- roughs' *Naked Lunch*

by Michael Barry Goodman

340 pages 1981 LC 80-28993
ISBN 0-8108-1398-X \$20.00

Contemporary Literary Censorship analyzes the banning of *Naked Lunch* as the last complete example of censorship of literature in this country. Goodman illuminates the turbulent literary period by examining the free expression and obscenity controversy in the context of literature. The discussion of the case against *Naked Lunch* from 1957 to 1966 links the landmark Supreme Court obscenity decisions, bringing together and explaining the free speech issues as they were manifested in the censorship of literature. Numerous unpublished letters written by Burroughs, publishers' files, court records, trial transcripts, and government documents detail the actions and suggest the motives of the censor, as well as of the writer, publishers, and lawyers.

"Carefully written, objective, and thorough . . . important for literary critics, libraries, and all who care about freedom of expression."

CHANGES IN AMERICAN SOCIETY, 1960-1978: An Annotated Bibliography of Official Government Publications

by David W. Parish

478 pages 1980 LC 80-12561
ISBN 0-8108-1309-2 \$24.50

The period from 1960 to 1978 brought social and political upheaval that permanently changed American life. *Changes in American Society* tells the story of that American revolution by describing more than 1,300 landmark federal and state publications. The author has selected those having permanent value in interpreting social change, including reports widely discussed in the media, heavily used by academic researchers, and those most requested by the public. Full bibliographic information and content descriptions are provided, and each report is thoroughly indexed by author, title, subject and chairperson. Popular names such as the Kerner Report are also indexed.

"... Balanced and easily accessible, the list is indispensable as a research and acquisition tool for the mostly free or inexpensive but as yet underused government publications. Recommended for public and academic libraries."

—LIBRARY JOURNAL, October 1, 1980

"... an excellent resource tool which gives users deep insights into the wealth of documentary publications available . . . a very good beginning source book with its strongest point being the inclusion of state documents."

A DECADE OF CENSORSHIP IN AMERICA

The Threat to Classrooms and Libraries, 1966-1975

by L. B. Woods

195 pages 1979 LC 79-20960
ISBN 0-8108-1260-6 \$13.00

The issue of censorship has become a mushrooming controversy in America. The effect upon public libraries and the curricula and library collections of elementary and secondary schools and colleges and universities is pronounced. *A Decade of Censorship*, the first attempt to explore this phenomenon on a national scale, is a compilation of the information available on more than 900 actual censorship cases that have occurred in the U.S., and mandatory reading for librarians, teachers, administrators, trustees, officials and laypersons who are likely to be faced with censorship pressures.

The study presents quantitative data to provide a framework through which censorship can be better understood and dealt with. Woods identifies titles of affected materials, along with censoring sources, reasons cited for objections, and the final results of such attempts. In addition, tabulations of censorship cases are given by years; states; regions; levels of institutions from K-12 through college, and public libraries; and by formats of materials affected.

"... a well-written, carefully prepared study . . . It should be of invaluable assistance to anyone who has to deal with censorship problems."

FROM BROWN TO BOSTON: Desegregation in Education, 1954-1974

by Leon Jones

2 vols. (2,190 pages) 1979 LC 78-8312
ISBN 0-8108-1147-2 \$79.50

"Mr. Jones has performed a remarkable service in bringing writings on the aftermath of the 1954 Supreme Court decision together in one place so that the reader can better grasp how it came about, how the nation has reacted, and, after all this time, how far we still have to go . . ."

—From the Foreword by Roy Wilkins,
Director, NAACP

In *From Brown To Boston* Leon Jones examines the results of twenty years of public school desegregation efforts and the pertinent ramifications of such efforts via the published works of the various researchers, social scientists, historians, authors, laypersons and the courts. The work is designed to make the highlights of critical studies easily accessible to educators, professionals, and other individuals needing "fingertip" information from the voluminous literary works on desegregation in education since the famous *Brown* decision of 1954. More than 5,000 books, articles and legal cases are summarized in the reference section.

"Jones, a professor in the Howard University School of Education, has produced a massive bibliography of major books, articles, and legal cases dealing with segregation and desegregation in American education . . . this unique book will be a necessary addition to major research and university libraries."

UNITY IN DIVERSITY
**An Index to the Publications of Conservative
and Libertarian Institutions**

The New American Foundation
Carol L. Birch, Editor

284 pages 1983 LC 82-20552 ISBN 0-8108-1599-0 \$18.50

Unity in Diversity is a detailed subject index to the publications of fifteen conservative and libertarian institutions. It was compiled by the New American Foundation (formerly the CFTR Education Foundation) in the belief that much serious research being done by scores of scholars in these new research centers was being overlooked by lawmakers, scholars, and university graduate students who were dealing with current issues of great consequence.

The index covers 3,021 documents (primarily magazine and other periodical articles, reports, and books), published between 1970 and 1981, that have not been included in other major indexing and abstracting publications. Thus it provides access to new research that is "altering the face of America's self-image and policy research."

**LAW ENFORCEMENT: A Selected
Bibliography**
Second Edition

by George T. Felkenes and Harold K. Becker

337 pages 1977 LC 76-50010 ISBN 0-8108-0995-8 \$16.50

The revised and expanded second edition of *Law Enforcement: A Selected Bibliography* contains over 5,900 references to articles, comments, notes, and books of national, regional, and local significance for those operating within the field of law enforcement. The bibliography goes beyond the role of the police and law enforcement *per se*, touching on the entire process of criminal justice including the courts, prosecution, probation, parole, and penal institutions.

"... necessary for upper-division and graduate students in a criminal-justice library collection."

—CHOICE, July/August 1977

CHILD ABUSE: An Annotated Bibliography

compiled by Dorothy P. Wells

458 pages 1980 LC 79-21641 ISBN 0-8108-1264-9 \$22.00

Winner of the 1980-81 Joseph L. Andrews Bibliographic Award presented by the American Assn. of Law Librarians.

Gross physical abuse and neglect of children is not a new sociological phenomenon. This carefully annotated bibliography of approximately 2,500 items covers every conceivable concept or aspect of the subject evolving through its long history. The bulk of the works stem from 1962, when Dr. C. Henry Kempe's article on the battered child syndrome appeared in the *Journal of the American Medical Association* and skyrocketed in the news. There is coverage of every plausible cause, detection and diagnosis, and management, prevention and treatment.

"This lengthy, annotated bibliography provides the best in compilation on the subject of child abuse ... This bibliography is concerned with a timely topic, examined at a thorough level, and should be a necessary purchase in academic, large public, and medical libraries."

LIBRARY LAW AND LEGISLATION IN THE UNITED STATES

by Alex Ladenson
(The Library Administration Series, No. 1)

203 pages 1982 LC 81-23176
ISBN 0-8108-1513-3 \$14.50

This is the first general work to be published on the subject of library law and legislation. Although all libraries exist by legal authorization, direct or indirect, librarians are often vague about the law on which their agency stands. Dr. Ladenson's presentation establishes the importance of the legal framework. He deals with constitutional, statutory, administrative, and case law, at the federal, state and local levels, pulling all of these together into a systematic structure for libraries. The several types of libraries are dealt with separately, and then together in legal matters that cut across type-of-library lines, such as interlibrary cooperation, copyright, security, and censorship. Running through the book is the recurring theme of the emerging federal-state-local legal structure of library service in the United States. The author presents this as well as the details of law in clear, straightforward language.

"This work provides valuable insight into the American legal system as it relates specifically to libraries. It provides librarians with a general background, and it gives lawyers a good overview of the development of American libraries."

INDEXING SPECIALIZED FORMATS AND SUBJECTS

edited by Hilda Feinberg

300 pages 1983 8½" x 11" LC 82-23155
ISBN 0-8108-1608-3 \$37.50

The indexing of information from widely varying sources and media is investigated and analyzed in this important new publication. Fourteen chapters, written by experts in the field, explore such topics as essential decisions in indexing system design; keyword indexing and free-text searching; database indexing; and indexing of the chemical, biological, biomedical, educational and law literature. Also covered here are the indexing of newspapers, encyclopedias, videotex and periodicals, the use of microcomputers in indexing, and the role of thesauri in indexing and searching.

Includes Rule Index to CSB

compiled by Sally C. Tseng

360 pages 1982 LC 82-10353
ISBN 0-8108-1572-9 \$16.50

This comprehensive work incorporates in one volume, LC decisions, policies, and all of the latest Library of Congress rule interpretations (LCRIs) of the *Anglo-American Cataloging Rules, Second Edition*, published in *Cataloging Service Bulletins No. 1* (Summer 1978) through No. 16 (Spring 1982). It also includes a rule index to CSB, indicating CSB issues and paginations. All of the latest LCRIs are arranged rule by rule on 8½ x 11 paper, printed on one side only, in a convenient loose-leaf format that provides flexibility for continuous updating. Tseng's *LC Rule Interpretations* is a cost-effective, time-saving tool that puts the latest LCRIs at the cataloger's fingertips.

"... The compilation by Tseng is, in several significant ways, the most convenient and useful tool for American libraries..."
