

11/17/21

Dear Sylvia,

A favor! We have a friend who was  
Princeton with Parkinson's while working for  
the International Confederation of Trade Unions in  
Uganda a few years ago, he's black. By a  
sucky stroke he was included in the experimental  
Program conducted at Columbia by Dr. Perry,  
which consists of the systematic administration of  
a drug (L or L-Dopa). While he has not been  
"cured" the advance of the disease in him has  
been arrested and on occasions May and I have  
noted some improvement. (He's a strong saddle  
rider)

A recent issue of Ramparts had an article on  
Aerupuncture which emphasized its little-known  
international practice. One sentence in the  
article particularly interested us. It noted  
that German doctors claim to have actually  
cured Parkinson's with aerupuncture.

I called it to our friend's attention. The catch is  
it is a milk on all our girls to investigate this  
claim. What we need are "in houses" to approach,

Someone who can tell us how to go about  
locating these doctors in Germany. The  
ultimate objective, of course would be a trip to  
Germany to consult them. Can you  
identify a lead in WHO? That would be a

Good preliminary

Thanks for calling about the 10 bag on Quin  
in the General Assembly. It was fascinating.  
And exhilarating. I took it all on his first  
occasion marking the further decline of  
American imperialism which I am glad to see,  
passed its peak with the Johnsonian  
war in Vietnam. American hegemony is  
gone. Possibly more than the east will be not.

If you get the opportunity see the Clinton  
cases and Lange H. But really need to see. I  
have just done so. Parallels with the frame up of  
OS would be striking, particularly in the  
manufacture of ballistic evidence and in the  
testimony of witnesses. As for a number of witnesses

And the association is by authority of medical ideas  
with arms violence.

When can we meet?

Fortunately

Tom
