New York, N Y

Dear Dr Miller,

I was able to listen to a good part of the discussion on the Warren Report last Friday at midnight. I should like to congratulate you on your able presentation of certain deficiencies in the official case--none of which, it seemed to me, were answered satisfactorily by the other participants.

I am an official of the World Health Organization of the United Nations, which I mention because you are a medical practitioner who may be familiar with the work of that Organization and to indicate that I am a responsible person. Since 11/22/63 I have spent every moment of my free time in studying the assassination and the subsequent events. I have read the 26 volumes of Hearings and Exhibits very carefully, and have found much information which supports, extends, and strengthens your criticisms of the Warren Report as expressed the other night. I have, in fact, prepared a very comprehensive subject index to the Hearings and Exhibits, since these volumes do not include any index and are consequently almost valueless for research and reference purposes. I am also writing a comparative analysis, demonstrating the conflicts and discrepancies between assertions in the Warren Report and the testimony and documents on which the Report supposedly depends--and these, I might say, are shocking in their number and serious nature.

My reason for writing at this time is to offer you complete access to information which I have compiled in the course of extremely careful study of the Hearings and Exhibits, should you have the opportunity for participation in public discussion of the Warren Report on a future occasion, or merely for your own information, as a student of the case. Please do not hesitate to contact me if I can be of help on any specific question, or on the case as a whole.

Yours sincerely,

Sylvia Meagher
