Dear Mr Gurney,

I was very interested in your letter in the current issue of TMO, since my own thinking corresponds very closely with your own postulate of cause-and-effect in a specific context. Do I infer correctly that you have been probing into the forbidden area of the assassination—more particularly, the Warren Report? If so, I should like very much to hear more about that. I have been preoccupied with the WR since it was published and am in touch with various people in different parts of the country who are busy with the same subject.

Please let me hear from you or, if you get to New York at all, please telephone me (Chelsea 2-4293 evenings, or Plaza 4-1234 ext 2024 during the working day).

Again, congratulations on your letter to TMO and best wishes.

Yours sincerely,
