

Louis Nizer - 40 Berry Gray - midday
Thurs 1/29/66 4/5 Medium

Tried avoid discussing WR, said didn't
come to discuss that. Gray pressed on
new books, doubts, etc. Nizer proceeded
and letterly against critics as wholly
irresponsible and their charges as spurious,
i.e., (1) the charge, based on a document the
critics had got hold of (authentic, true)
re rehearsal for funeral by US Armed Forces
2 weeks before 11/22/63 (2) hole thru wind shield
(3) charge rifle could not be fast enough,
shown to be non-sensical during on-site tests,
when agent in window shot human skull
that shattered just like JFKs. Anyone who
reads the critics should better read the
WR and the "50 volumes" would see how
base and false the criticisms are. There was
confusion, they found rifle, thought it was a
"Carboniere" who kept the rifle in a crate
covered by a blanket (and the baby in the garage?)

US treated Warren's arm - maybe a few errors,
advertent or inadvertent - but so has any
trial transcript - WR much better than trial.
None was the only "bad" witness.
