Dear Sylvia :

Please excuse my delay in replying to your last letter as I have been preoccupied with work on a Centennial historical publication as we attempt to meet a rapidly approaching deadline .

I am disturbed to learn of your loss of confidence in the Garrison probe and must confess that at times I have similar thoughts concerning a double standard .

Nor am I entirely satisfied with certain specific aspects of the investigation - and in particular with Garrison's reluctance to consider all possibilities with respect to impersonation of Oswald .

But in spite of these reservations I still feel that Garrison is on the right track and still hold out hopes that the investigation might prove to be a historic breakthrough .

The concerted attempt by the mass media to discredit Garrison before the Shaw trial seems to indicate that the Establishment knows or at least strongly suspects that Garrison has the evidence to back up his charges .

It is also very difficult to judge the methods being used by Garrison as an already complex situation is being clouded by accusations and the apparent fabrication of evidence as in the case of the celebrated Newsweek tape recording .

In any event I look forward to the Shaw trial and hope to have an opportunity to visit New Orleans when the trial finally takes place .

We are also continuing to investigate the matter of CIA (Evergreen Advertising Agency) coded commercials on Canadian radio stations and we are confident that we will soon have sufficient material to bring the matter before the Board of Broadcast Governors .

With very best wishes , I remain

Sincerely ,

Gordon

Gordon R. Pollard .
