ACCESSORIES AFTER THE FACT

List of New Points of Evidence in  
SIX SECONDS IN DALLAS

(Meagher, October 1967)

Connally hit at frame 238 corroborated by air forced into cheeks  
Sitzman and the Newmans saw impact at frame 313 at right front of head  
"Echo effect" in fact means shot from knoll would sound like shot from TSBD  
Wire 11/23/63 a.m. to Dallas FBI office says bullet below shoulders, 45-60° trajectory,  
short depth, no exit  
Specter questioned Sibert and O'Neill 3/12/64 for 45 minutes; they stuck by and  
even reinforced their report  
"End of opening could be felt with finger"--i.e., even if location of wound is higher  
than holes in clothes, there is still crucial evidence against bullet transit  
In goat tests, exit invariably larger than entrance, not the reverse (as in JFK per WC)  
Anterior neck wound may be too small even for entrance of 6.5 bullet (3-5 mm vs 10 mm max.)  
Contusions vertical 4-6" at site anterior neck wound, tracheal tear is at right front--  
totally inconsistent with rear to front transit of a bullet  
Connally, frame 238, cheeks puff, hair disarranged, mouth opens (wind knocked out),  
shoulder buckles (32° to 52° in one frame)--all involuntary reactions, ruling  
out "delayed reaction"  
No fibers carried into his back (as in wrist)--i.e., pristine bullet  
Double head movement: forward at ~~69.6~~ 69.6 feet per second, backward at 100.3 fps,  
vs falling body at earth's surface accelerates 32 fps  
Neuromuscular reaction (head snap) ruled out by speed of snap--i.e., eyeblink  
in 40 milliseconds, vs change in direction in 56 milliseconds  
Also: neuromuscular reaction would cause progressive acceleration of head, while  
in fact velocity after frame 314 is constant (classic neuromuscular reaction  
is that body goes limp, not in any direction in particular)  
Bone found 11/23/63 on south side Elm appeared to be from occipital region head; but  
shot from rear could not drive part of rear skull 25 feet to the left  
No. 3 shell has dent in lip, could not have been fired in any rifle 11/22/63  
Missing from No. 3 shell is chambering impression along side, found all other  
shells bullets and test bullets fired from Carcano  
On 4/14/64, Eisenberg memo said CE 399 was not in wrist and Connally hit by 2 bullets  
On 4/21/64, Light and Dolce strongly rejected CE 399 as the wrist missile (Olivier  
withholds opinion pending tests)  
Specter carefully did not ask Light, Olivier, Dzeman if CE 399 could be the single missile  
An additional face sheet "disappeared" between autopsy room and WC files--did Humes burn?  
A WC staff member (WJL) told Life he was "certain" Humes had burned original autopsy  
because it was contrary to the official report  
Specter worked average of 3 and 1/4 days per week (26 hrs) for 10 months @ \$10,719.28  
Jacket: FBI failed to trace "B 9738" or "30 030" marks, although canvassed 424  
establishments in Dallas, Fort Worth, and New Orleans; LHO other apparel had no  
laundry or dry-cleaning marks of any kind ?  
3 Dal-Tex women saw 2 men with rifle [11/21/63] 5:10 pm in parking lot behind TSBD  
Carr saw man corresponding with Walthers No. 2 man, Hughes film man in next window,  
Worrell's man escaped rear TSBD, and Craig's man in station wagon  
Robinson also saw man enter station wagon, corresponding Craig's man

New Points (Accessories After The Fact)

Sawyer, not known if he was there in the first place  
Failure to search Depository despite eyewitness reports  
Brennan not source of 12:45 description  
Norman Jarman Williams went to 4th floor  
WJL admitted "least direct evidence of all" LHO was in window  
Unknown witness (other than Worrell) saw man flee from back of Depository  
Willie Mitchell saw no one in window  
False SS agents at back door and on knoll

Medical testimony against "delayed reaction" omitted from WR  
Trajectory of 45° quoted continuously, suddenly abandoned  
Silence of WC and all others re head snap seen in Zapruder film

WC arbitrarily changed date LHO cashed check A&P from 10/31 to 11/1/63  
All LHO luggage too small to hold rifle even disassembled  
Hump in blanket ~~about~~ 10" vs scope 11", Stombaugh says could not have been made by  
object longer than 10"  
No oil stains, marks, or other evidence rifle was in paper bag  
No oil stains in blanket, though rifle well oiled  
All underestimate length paper bag at about 27"  
Disappearance Studebaker tape on paper bag  
Another paper bag found in Irving Post Office dead letters

Indications that Givens' story 11:55 encounter LHO on 6th floor is perjury and collusion  
Lovelady/Shelley affidavits 11/22/63 consistent with Victoria Adams' story, testimony not  
Baker 9/23/64 said LHO "drinking a coke" then deleted phrase; Jenner said same 1967  
Pierce Allman met LHO near front door TSED, i.e., LHO lingered, not "escaped"  
Police searched bus right after LHO departed bus  
Timing taxi ride reduced 11 to 9 to 6 minutes  
Apparent perjury Fbitz/Gerald Hill vs Decker/Brown on link between JFK and JDT suspects  
Unexplained foreknowledge by DPs of LHO's Beckley St. address and Elsbeth St. old address

Misrepresentation by WC of "misidentification" as Mauser and failure show rifle Weitzman  
Serial number rifle not exclusive  
Scope mounted for left-handed man  
Two homemade slings, neither used or traced  
WC failure establish discovery and authenticity ammo clip  
Some markings on 3 shells found TSED not made by Carcano, contrary to WR  
Failure ~~to~~ FBI canvass to trace purchase of ammo, ditto, 30 lbs shells collected  
Ammo not recent or current as WR asserts  
Palmprint on rifle may be fabricated; Griffin admitted would have been very, very  
difficult to detect forged evidence by DP or FBI  
No rifle cleaning equipment (ramrod, etc) found LHO possessions anywhere

Chalk mark on stand-in "at point where bullet entered"  
JEH misrepresented significance of 1/13/64 Report on indications exit at front of  
neck--then thought to be exit head fragment  
30 FBI and SS interviews PH personnell suppressed  
Transcript Perry press conference "lost"  
Lacerations pharynx and trachea larger than skin wound, i.e., bullet went front to back  
FBI told Washington Post December 1963 bullet found deep in shoulder  
Sibert/O'Neill rely on path of fragments through brain, do not mention any small  
bullet hole back of head  
Autopsy skull diagram does not show entrance wound head  
Autopsy face sheet arrow shows head bullet traveled to left (instead of to right).  
2 contradictory sizes Connally back wound  
No fabric traces on stretcher bullet  
Spectrographic findings mentioned by R. Frazier indicate lack of identity bullets,  
smears, metallic traces

Bias and predisposition

Considered only Depository in accounting for source mark on curb, Tague cut  
Favorable toward Brennan, self-admitted liar; unfavorable toward Worrell, who  
reported man fleeing from rear of TSED

Impeached Rowland, but ignored manifest police perjury and concealed Griffin  
accusations against Dean, Newman of perjury

Interpretation of Zapruder film as consistent with lone assassin

Finding that lineups were fair, despite contrary evidence

LHO had enough time despite traffic, Ruby did not because of traffic

Accepted Marina's account of Walker shooting, despite large body contrary evidence

Accepted single-missile, lone-assassin theories despite massive contrary evidence

Impeachment of witnesses (Bogard, Rowland, Hunter, Whitworth, Ryder, etc.)

Rejection of Kantor/Tice testimony

Use of euphemism "abortive transfer"

Accepted Butler denial, vs Guthrie assertions Ruby involved attempt bribe him

Illogic and double standard

- Thesis that a fragment from the 313 head shot traveled 260 feet to hit curb, while other fragments same bullet dropped gently into car
- Denial that Hughes film showed 2 men in window, boxes only, and indifference to fact it failed show LHO in window
- Thesis of "delayed reaction" to wounds in vital organs causing involuntary reaction
- Conclusion that shield of cartons needed for concealment when pillars, cartons already on sixth floor provided built-in shield
- Acceptance of Blodsoe testimony LHO had no jacket, vs three other witnesses who said he was wearing a jacket
- Circular reasoning on purchase and possession of ammunition, established only by inference, on basis he used it; and thesis markings on shells came from dry runs (i.e., his only 4 bullets ever?)
- Advocacy of single-missile theory regardless of actual size Connally back wound-- whether 1.2 or 3/5 inches.
- Benavides, witness closest to Tippit at shooting, failed ID LHO; but accepted IDs of Markham and others of highly dubious nature
- Contrived explanations of lack of match between Tippit bullets and shells found
- Evaluation of LHO/State Department transactions as "normal"
- Overriding importance attached to lost Bogard card
- Request for comparison between LHO actual shirt on arrest and shirt seen in photos taken on arrest, when no one raised any questions challenging the shirt, but failure to request comparison with "doorway" shirt
- Rejection of ID of LHO at Habana Bar, New Orleans, on grounds he was not a drinker, ignoring fact he ordered lemonade, and got violently sick on tequila
- Rejection of Kantor/Tice testimony, on grounds of Ruby denial
- Attacks on identifications of Ruby, as against complacent acceptance IDs of LHO
- Disregard of massive evidence Ruby at police HQs Friday evening, despite his lack of alibi for time involved, on grounds his denial
- Disregard of evidence Ruby there Saturday late afternoon, on grounds Ruby has not mentioned such a visit
- Rejection of IDs of Ruby at police building early Sunday on ground man thought to be Ruby was unkempt, and suggestion it was another man, seen in photo, who was exceptionally well-kempt

Impeachment of witnesses (as unreliable or mistaken)
