

Honey, Dew Not Put Us On

Olson, Alvarez, and Hoch
(Pronounced to rhyme with "joke")
Formed a grand alliance
To demonstrate by use
Of dazzling Science
(And merciless abuse
Of lowly melon)
That Oswald was indeed
An unassisted felon.

Let authors of the WR rejoice
Three academicians with a single voice
And thermodynamic hocus-pocus
Will vindicate their suspect opus

Small wonder if we dwell on
The melon burst asunder
And sans casaban blunder
To the rear it fell
Oh, fruit! thou swell!
Where apple proved the law of gravity
Cantelope revealed the rule
Of doctoral depravity.

Masters of the jiggle, blur and frame
A place awaits you in the Hall of Fame
By sacrificing persian, cran and shaw
You beautified and tidied Newton's Law
Aspire to demonstrate, in your next stunt,
How one gets shot in the back from the front.
