Dear Mr. Kihss,

I have had some further phonecalls from people contacted by Mr. Edward Horsey in the St. Petersburg area, which suggest that he is not a reliable source of information. On the contrary.

I am sorry that I bothered to call his "story" to your attention but at the time it seemed reckless to dismiss it out of hand. This case seems to attract four confabulators for every sober researcher, and it is sometimes hard to separate the science from the fiction.

Best regards,

Yours sincerely,
