Medical Center
Kansas City 66103

Dear John,

Many thanks for sending me the interesting article from the Kansas City Star magazine. It is one of the few pieces which appeared in the press on the anniversary of 11/22/63, which gets less and less attention with every passing year, and will help keep the issue alive for the public.

One thing that puzzles me is your finding on the penetration power of the bullet (page 24 column 4). As I recall it, the CBS so-called documentary on the Warren Report included tests of the penetration power, simulating those conducted by Dr. Olivier et al at Edgewood Arsenal, but found that the bullet failed to achieve the penetration required by the single-missile theory.

In case you have not already received a copy, I am enclosing an article published a few months ago. With cordial regards,

Yours sincerely,

Sylvia Meagher
