

28 January 1968

Dear Bill,

A friend of mine at the UN tells me that about 10 or 12 days ago he heard a long program about the Warren Report on WBAI, in which I was mentioned a great deal (and Accessories). I judge from his description that it was your 11/22/67 documentary that was broadcast --apparently without advertisement, listing, or other advance notice!

I am especially chagrined, because I was really eager to hear your work as a whole, and to tape my own remarks at least (as read by someone else), since I had sent you the only transcript. Can you return that? Or, if possible, send me a tape of the whole program. I would retape it or type a transcript of those excerpts which should be on record in my files.

Also, please send me the "good" tape of the Liebeler/Weisberg confrontation. I will replace any tape I keep, or pay for it (there is no reason for you to absorb the costs).

No news, otherwise. Steve Burton's New York counterpart, one Trent Gough, dropped in together with Dick Sprague one night early last week, to show me "new photographic evidence." Nil, except for a photograph of some tramps pulled in from the RR cars for questioning, one of whom bears a resemblance to Bradley. Sprague and Gough are, of course, CERTAIN that the man IS Bradley, man-in-the-doorway fiasco notwithstanding. (Sprague now concedes it is Lovelady, without question.) I bet Sprague \$50 it is not Bradley, winnings to go to Gough's committee. At my suggestion, he changed the original name (which was the same as the Burton committee's) to "Kennedy Assassination Inquiry Committee." He has also veered from a pro-Garrison position to one of caution and non-commitment. He is doing some worthwhile things and probably deserves some support; however, I am congenitally uneasy when I see a cause become a "Cause" which inspires organized, bureaucratic activity.

All the best,

Sincerely,
