

Thanks for reading the  
Trevor-Roper. A gracefully  
written piece, I suspect based pri-  
marily on Mark Lane's work.  
At least on the medical evidence  
he doesn't sound as if he had  
been through it himself, but had  
listened well to someone else's  
account. I guess due to some  
mail rush I didn't receive  
the article until today, Sat,  
the 19<sup>th</sup>. I'm glad the Report  
is questioned by an able and res-  
pected historian - his aim for  
weak spots would certainly be  
confirmed by our experience with  
the report. *Custer*
