Intelligence Chief In Dallas Shifted

Dallas (AP)—The Dallas police department's intelligence section chief—who had said an FBI agent told him the federal agency had information about Lee Harvey Oswald's capability for assassination — was transferred today to the police personnel division.

Oswald was the accused assassin of President John F. Kennedy.

A memo Lt. Jack Revill wrote three hours after the Nov. 22, 1963, assassination of Kennedy came to light in April, 1964. It detailed a conversation with FBI special agent James P. Hosty Jr.

Revill told the Warren Commission he had been examining the Texas School Book Depository building after the shooting, then returned to the city jail basement and met Hosty, unaware that any arrests had been made.

Revill told the Warren Commission Hosty said:

"Jack, a Communist killed the President . . . Lee Harvey Oswald killed President Kennedy . . . He is in our Communist file. We knew he was here in Dallas . . . We had information that this man was capable" of the assassination.
