Dear Sylvia,

Your Mets? I thought they were mine. Oh, well; petty jurisdictional squabbles must bow before the victory of justice. My underdog mentality keeps ~~me~~ getting in the way of my better judgment, so I was all for the Mets. Let's hear it out there for Fun City.

Many thanks for the copy of your NYT letter in re Lewis. I'm going to order CD5, p. 400. (And by the way, I am green with envy. You write the best go-to-Hell letters in the world).

Attached is a list of interesting CD's I have, exclusive of the ones everybody already has (Ferrie, Bringuier, etc.).

Mary Ferrell is a sweetie. I just heard from her and she offered me a place to stay if I ever get to Dallas. As to her orientation as far as it is concerned, she says she handled most of Garrison's Dallas research, but describes him as the most charming nut she knows. Fred Newcomb, who is very, very down on Garrison, gives her high marks in that department.

It may be tonight that I finally get to hear Uncle Chester's contribution. Hope so. I think Fred Newcomb (or maybe Lifton) is going through Mary's tapes noting variances from the transcripts.

That Joesten yarn is too much. The critical community is certainly leavened with an array of odd folks, ish't it?

Getting busted is becoming endemic among us buffs. Don Olson made it to Berkeley just in time to suffer a narrow escape from a police sweep down Telegraph Avenue. I hope SDS is big down there: if Weatherman and the bulls concentrate on each other, they'll be too busy to hassle us decent folk.

And with that, you can zip into my CD list.

Best wishes,
