

DL 100-10461

RPG/ds

On June 5, 1964, the FBI Laboratory furnished the following information concerning a firearms examination requested by the Dallas Office on May 14, 1964:

Specimens received 5/18/64

Q579 C320 U. S. Rifle, caliber .30-06, Model 1903 (Rock Island Arsenal), Serial No. 66091, obtained from Robert Adrian Taylor

Results of examination:

The correct description of the rifle obtained from Robert Adrian Taylor is as listed above. This rifle has been designated as C320 for record purposes. Examination of C320 showed that the upper and lower bands have been removed, the front portion of the stock has been cut off, the wooden handguard originally covering the top of the barrel has been removed, the rear sight has been removed and replaced with telescopic sight mount blocks and the bolt handle has been ground down and bent so that it would not strike the telescopic sight tube when the bolt is operated. All other parts appear to be original, unaltered parts. The rifle has the standard length of 43 1/4". The barrel has not been shortened. The length of the longest portion (barrel and receiver) is 31 7/8". The stock portion is 28 3/4" long which is less than the standard length of 40 1/8" for a "non-sporterized" stock.
