p. 86 Boswell admitted abscess

87 "said, fiber-like particles
at back wound.

"Clean" vs "lacerated"

88 size of gaping head wound
also, 11cm vs 10cm Δ

1.2 vs 1.5 cm viz

what value in 14cm figure?

93 Humes vs Fisher re
"penetrating wound"

98 14 vs 15 cm for acromion

100 7 x 4 mm vs 7 x 10 mm

110 reconstruct of 2 panels, demonstrating

115 exit of head missile →

167: 7 basis

(Parenthetically, Howard, I find the chapter on Specter sketchy and unfocused - a little weak. It should start with a fuller account of his perfidies, including his origination and formation of the single-bullet theory - drawn, if necessary, from the major critical works on the W.R.)
