Dear Miss Meagher:

I have the mss and it is in good shape. However, if you want to recheck all the citations let me know & I will hold off composition. I had planned to start in about three weeks.

Do you have a carbon to use for checking or do you want the mss returned?

If you will send me corrections and the new citations (assuming you have a carbon) I will insert them. They should go in before we start composition since we use coldtype and go directly to page proofs.

By all means, let us include the name index — and make it as complete as possible. I will hold up composition until I hear from you on this & the above queries.

Re the market — the Congressional distribution of 8200 will not result in many index sales, but I am not worried about its sale. It will probably run a thousand copies — and if it does more (or less) we will both be content.

in making available a very useful tool.

Sincerely

Ralph R. Shaw
