

Telephone call from Larry Schiller 12/6/66 8 pm

Saw Ed Epstein—he said only very nice things about SM but complained about Vince said Vince had been very rude to him several times...Schiller feels Epstein still just a student, his convictions not firm, he did not realize what he was getting into when he published his book, was ready to back out but it was too late.

Schiller called mainly to get the verbatim of Zapruder on \$25,000 and suggestions for questioning Specter today. Spent the day at the Archives; word in Washington is that an investigation will be ordered in June 1967; rationale is that Manchester book will be so damaging to LBJ and convince people that he was responsible that LBJ will be forced to order a new investigation, otherwise be judged guilty and covering up.

Dropped hints about Zapruder frames 208-211, told by LIFE original film broke at that point--clued me to bear in mind that break here might have been caused by preoccupation with segment before or after 208-211. Promises tell me much very interesting information when record is out.
