Dear Sylvia,

I just saw a copy of Paris Flammonde's new book which is a one-sided defense of Garrison from what I could tell from a brief look at the book and an earlier reading of an excerpt from in which was printed in Evergreen.

I was shocked to find you cited, along with Bill Turner, as a critic who gave Paris much help. I know little of him and haven't read his book, but was surprised to find you cited in such a pro-Garrison-biased book. Did he misuse your name? I am very interested in this because I distrust people who are super-gung-ho Garrison and know little of Flammonde except that he was supposed to write a flying saucer book. As much as I carefully follow ~~the~~ work on UFO's, it is a bad thing to mix with the assassination work publicly.

If Flammonde ~~did~~ misuse your name, and you write to him, I would very much appreciate a copy of your letter. You could send me a carbon, I could xerox it, and then mail it back.

*Gary*
