Dear Sylvia,

Many thanks for your informative letter. I think that the situation with regard to Flammonde has been clarified. I would appreciate it if you could tell me when your review appears in *Commonweal*.

Your information on UFO's was quite interesting. I agree about government suppression being a factor in both. In fact, I have, although I have not yet had time to read, the Condon report and the critical books thus far out on it.

Your idea for researching the background of "expert witnesses" is an excellent one. I thought of it some time ago also but was very negligent about it and had forgotten it completely until you brought it up. This could be an important area of work. I have several people who will be starting on it in a week's time. I now have a group of interested and hard working researchers who can do work in many different areas. This is a big help since I have been a one-man show for far too long. The memo written by the law student which refuted Garrison and Lane's claim about federal court injunctions was an excellent example, although not too pertinent to the case. He is now working on the freedom of information bill. Two are on Malcolm X and are being assisted by two others who have a double function. All in all I am very encouraged.

This coming weekend I will be up north in Duluth and Virginia City and will be presenting some of Lifton's slides and some of Fred's on TV. I will have 24 hours with nothing but appearances which is the way I like to work. I hope to avoid all comment on Garrison and keep the focus on the "old evidence." To the people out here the "old evidence" as presented on slides is new and astonishing. Before the year is out there will be at least one other person, who I am training, who will also be speaking publicly. The IRS is undoubtedly watching carefully since I don't accept fees, except expenses or occasional donations, and ask that any fee be turned over to the local library to purchase books on the case.

I am sending a copy of your letter to Vince because of the material on UFO's which is quite interesting. The last comment, on Crisman, is well worth looking into. Crisman is a real gem.

Take care.

Gary
