

12 July 68

Dear Mrs Meagher,

An enclosing a copy of a letter to Bob Ruark, WLCY, voting to have him drag you back for another performance.

I was very fortunate in having dragged out my tape recorder & hooked it up for your show. Had I not done it I'd probably still be muttering to myself over my beer about how lousy everything is and how you can't beat the Establishment and how simply anybody who gets consistently heard must be some kind of dupe or else you wouldn't continue hearing him, and how etc etc etc.

But thanks to the tape recorder, and thanks also to the lousy fact that I will hear or read things differently each time I hear or read them... thanks to these things I ended up realizing that everything you said throughout the program was in response to questions which had been provided you. And also plus realizing that had you been free to ask your own questions, then your air time might have been different - and probably more enjoyable ~~##~~ for yourself.

What made me so unhappy on first hearing the show was the impression of it somehow "standing still" in time - as if it were, almost, a replay of some Open Mike program of 3 years ago. Questions about bullets. Questions about the validity of the W/R. Questions of all sorts which serve no better than to instill into the minds of recent newcomers that the entire JFK assn controversy, after some 4 1/2 years, has to do with some question concerning Dealey Plaza bullets.

Well, I guess I'm hard to please. It just frustrates me all to hell when I think that in 1978 there will still be controversy about bullets and about "the validity of the W/R". How do you get people to asking the right questions? Do you get an Acid Stomach wondering about it? Have you tried Tumms? Pepto-Bismol?

Thanks for the WLCY show, & please come back - & keep writing for TMO.

The news about the coming 5-day mail delivery service was real great! It was even wonderfuller with the announcement that it was only a first step toward 4-day service. What luck! This is even better than having the Feds intervening with Garrison. Next thing you know, some citizen someplace might sit down with a pencil & figure out that the Post Office Dept savings would amount to Two Percent of the Viet Nam war cost in dollars. (\$1/2 billion vs \$30 billion)
cc: Helen

Regards,
Steffen Sorensen

Did you notice that news item re powder burns on RFK's head? Reminds me of that "smoke smell" lingering all the way from Dealey Plaza to the inside of the hospital. Unless Thompson was right, and Gov Connally did indeed shoot JFK in the head at close range, and unless also somebody slipped in (unnoticed by the crowd) to shoot RFK from a distance of some 2 or 3 inches during the excitement... if you can't accept such possibilities as that, then you must consider other possibilities. Such as, I mean, exotic self-explosive bullets which might blow up on contact. # And if you can't buy such things at Sears Roebuck, where would you get them? A useless question, probably. If it is ever pursued, then it will be explained to us that the JFK smoke smell was caused by a passing diesel truck, and that RFK had just had his ~~####~~ hair singed by a barber.
