

Dear Sylvia,

11/17/70

Received copies of your letter of 11/15 to Garrison and of that of 11/16 to Hoch this morning. The former makes the record clear, the latter should be limited to a discussion from which nothing is now to be gained. Let Hoch fantasize about Newton's laws and Thompson's theory. Perhaps later he may see the light.

Last night I came home to a thick envelope containing two copies of Hoch's Oct 23 piece. I decided not to read it as I have nothing more to say unless and until he answers me with discussable matters. What is odd about that envelope is the return

address which reads: Harold Weisberg
Route 8
Frederick, MD 21701

The envelope is stamped Third Class

Do you know why I should receive
these copies from Weisberg and why
he did not include some word of his own?

Is anything to be gained by writing to him?

To _____

Should I read Garrison's book?
