Dear Mr. Yardum;

Thank you for your letter of February 10, 1974. I am not presently doing any work on the JFK case per se. But, I think that much of what happens at this time can be explained on the basis of what we have learned already about that case. John Kennedy was killed by an intra governmental CIA conspiracy which was designed to reshape the government, our people, and the world. The killers were at the very top of the United States government. That same group is in control today. The same group assassinated Johnson through Vietnam and assassinated Nixon by entrapping him into their little Watergate sink hole. That same group is presently in control of the press as it was then. That same group destroyed the Presidency in order to accomplish a world governmental structure with peace without justice.

Think about the great changes in youth, the nation, the world and humanity since the killing of JFK. Then trace these to the assassination. Then you will learn about the world.

Sincerely,

(signed)

Vincent J. Salandria

Dear Tom: Above is exact copy, "warts and all", of a letter that came into my hands from Yardum, who is a junior college student who has been contacting me occasionally, since his virtual childhood. Vince becomes more ridiculous with every pronouncement. The idea that Nixon has been "assassinated" via entrapment into Watergate is pure paranoia--or worse. Thanks for your recent letters. Time is tight now but when I have a chance I will phone you. Meanwhile, enjoy the fatuities of our former colleague.

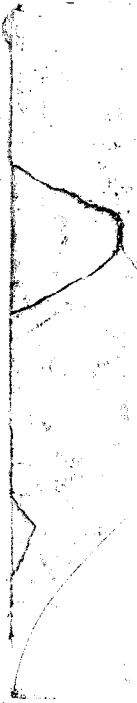

V. Salandria
