Dear Tom,

In answer to your letter of November 13, 1974 please be informed that I have no information to the effect that Fred Korth was involved in the assassination. At one time I considered the hypothesis that the JFK killing was the work of the American military. In light of what we know concerning this successful coup and what we know regarding who is presently in control of our government, I reject the hypothesis that the military could have conducted such a successful coup and yet ended up with the CIA in control of the government.

The Cooper story only interests me in that a human being was killed. I cannot believe that Cooper could have come across anything of significance with respect to the assassination. I don't know whether Garrison was being fed any of this material. Ask him, if the matter interests you. Best regards to you and your wife.

Cordially,

Vince
