

Thanksgiving Day '75

Dear Sylvia,

Turned on WQXR a minute ago to get background music while I write to Lillian who called right before last to discuss just installment of CBS pieces after I <sup>had</sup> and before he saw it. Caught an announcement of a special issue of a magazine, Sceptic, on the JFK assassination, tied to a four-issue trial subscription. Called the telephone number they gave and arranged for the deal for myself and also for you. Cost \$4.97. Will arrive in two weeks. If not agreeable you can advise Sceptic by mail at WQXR, NY 10036 or call 212 MW-1100. Called you

Two nights running. No answers. Figured  
you're away for holidays.

Light - surprise. Forthcoming for first time.

Informative about Wecht. Believes him

incompetent - unable to read x-rays. More

important, his idea about receipt for

missile: Weisberg first to find receipt in Archives;

light knew about it since about ~~1967~~

1971; broached the matter to FBI; eventually

got letter receipt refers to metal removed from

brain; rejects this; believes 399 was originally

intended to be "removed" in autopsy, but

something went wrong. That's as far

as our talk went.

Gave me sleepless night, thinking about

implications with respect to kidnapping of JFK  
corpse. What bearing does it have on motivation for  
kidnapping? On conflict in Burdand Hospital?  
Did the Dallas officials see a threat to their frame  
up in removal of body for autopsy in Washington?  
Or was it the other way around?

Most important, Lufkin evidently advanced  
beyond examination of Warren Commission's  
'evidence' to search for track of frame up -  
encouraging.

Tom
