

Subject Index to the

Warren Report and Hearings & Exhibits

Sylvia Meagher

New York, N.Y.

1965

## Explanatory Note

The subject index represents the classification of information in the twenty-six volumes of Hearings and Exhibits, containing the transcripts of the testimony of witnesses and the documents, as well as that contained in the Warren Report itself, under a series of subject classifications and subdivisions. The classifications encompass all elements in the assassination and subsequent crimes as well as the background and history of the principals.

The references under each subject incorporate but extend beyond the citations ("Notes") in Appendix XVIII of the Warren Report. For example, the Report gives citations for sixteen sources in the section dealing with Oswald's rifle capability (Warren Report pp 189-195, Notes 761-818). The subject index, under the classification "Marksmanship," provides thirty-four references, adding eighteen citations to those in the Report.

While the subject index draws upon and encompasses the footnotes in the Report, it derives primarily from detailed study and critical analysis of the Hearings and Exhibits. Consequently, it includes negative references—that is, references to testimony or documents which fail to include mention of an expected subject. An example is found under the classification "Hidell/". A police witness testified that he asked for Lee Harvey Oswald or Alek Hidell when he went to the rooming house on North Beckley Street. The references include not only the testimony of the police witness but also the testimony of the housekeeper, who stated that the police officers had inquired for Lee Harvey Oswald but who did not corroborate the alleged mention of Hidell.

References which at first sight appear to have no direct relevance to the subject under which they are found have been included, similarly, for their ~~value~~ negative value or related reasons.

The objective of the index is to provide guidance to all information of direct or indirect importance, according to a rationalized system of classifications,

contained in the Hearings and Exhibits. It is hoped that the systematic, comprehensive key to all the source material on any specific subject will enable scholars to test the assertions and conclusions in the Warren Report against their independent judgment, on the basis of fidelity to the source data and impartiality of selection by the authors of the Report.

NAME INDEX SUPPLEMENT  
WARREN REPORT HEARINGS & EXHIBITS

Sylvia Meagher  
New York 1965

Explanatory Note

Volume XV of the Hearings provides a name index for the witnesses who presented testimony to the Warren Commission and for persons mentioned in that testimony. The Volume XV index does not include exhibit numbers from Volumes XVI-XXVI nor does it include the names of counsel or observers present at the examination of witnesses.

This name index therefore supplements the Volume XV index by (1) adding the exhibit numbers ("CE" numbers) for persons included in the Volume XV index; (2) adding the names of persons present during the examination of witnesses—Commission members, Commission counsel, counsel accompanying witnesses, and other observers; and (3) adding the names and exhibit numbers for persons not included in the Volume XV index. Brief descriptions follow each name, as an indication of the person's function or relationship to the principals in the case.\* In some instances, the index gives references to mentions of the person concerned without specific use of his name, when the actual identity is clear from the context. Those references are accompanied by the notation ("unnamed").

Page numbers in parentheses may refer to the pages of an exhibit, when that pagination is clear, or to the pages of the volume in which the exhibit appears.

It is self-evident that this index should be used in conjunction with and as a supplement to the Volume XV index.

\*See "Key" at end of Name Index Supplement
