Special Agents ROBERT M. BARNETT and IVAN D. IEE, of the Federal Bureau of Investigation, accompanied by TOM C. DILLARD, a Photographer for "The Dallas Morning News," and JAMES UNDERWOOD, a Newsmen for KRID-TV, went to the area approximately twenty feet east of the triple underpass and on the south side of Main Street. Through the use of the same camera used by Mr. UNDERWOOD on November 23, 1963, and by aligning three reference points in a photograph of the Texas School Book Depository (TSBD) Building taken by Mr. UNDERWOOD on November 23, 1963, from this same area, it was ascertained the mark observed and photographed by Mr. UNDERWOOD and Mr. DILLARD had been at a point on the curb twenty-one feet and eleven and one-half inches east of a point where Main Street passes under the triple underpass. This same point where the mark had been observed by Mr. UNDERWOOD and Mr. DILLARD was seventy-three feet and five inches west of the first lamp post on the south side of Main Street, which lamp post is the first one located east from the triple underpass on Main Street.

The area on the curb from this point for a distance of ten feet in either direction was carefully checked and it was ascertained there was no nick in the curb in the checked area, nor was any mark observed.

Reference points in the photograph taken by Mr. UNDERWOOD used to locate this point were a lamp post located in the right of the photograph, which appears to be midway between two buildings, a lamp post located on the north side of Elm Street, which is in line with the third row of windows from the southwest corner of the TSBD Building, and which face south, and a traffic sign located on the left side of the photograph, which is to the west of the TSBD Building.

It should be noted that no nick or break in the concrete was observed, in the area checked, nor was there any mark similar to the one in the photographs taken by UNDERWOOD and DILLARD observed in the area checked either by Special Agents

BARRETT and IEE, nor by Mr. UNDERWOOD or Mr. DILLARD. It should be noted that, since this mark was observed on November 23, 1963, there have been numerous rains, which could have possibly washed away such a mark and also that the area is cleaned by a street cleaning machine about once a week, which would also wash away any such mark.
