

3/31/68; LIST B

FEDERAL BUREAU OF INVESTIGATION

Date September 29, 1964

1

On September 29, 1964, EUGENE P. ALDREDGE, 9304 Lenel, Dallas, Texas, telephonically advised that he disagreed with the President's Commission report that CSWALD did not have help in the assassination.

ALDREDGE stated he saw a television program shortly after the assassination, believed to be on Channel Four, in which a mark on the sidewalk was painted out.

Approximately three months ago, he stated he viewed such mark, which he is sure was caused by a bullet, and that this mark is approximately six inches long. He described the location of this mark as being in the middle of the sidewalk on the north side of Elm Street, which side is nearest the Texas School Book Depository Building. He stated there is a lamp post near the sidewalk, which is about even with the west end of the Texas School Book Depository Building and that the above-described mark is approximately eight feet east of the lamp post on the sidewalk. He stated that a reporter for "The Dallas Morning News", CARL FREUND, has also stated this is a bullet mark.

When asked as to why he had waited until this time to furnish the foregoing information, he stated he felt that such an important point would be covered in the President's Commission report and did not want to become involved by furnishing the information at this time, but felt that such information, if overlooked, should be made available.

CD 154

Date September 30, 1964

1

The sidewalk on the east side of Elm Street between the triple underpass and Houston Street was visually checked for any scars which might appear to have been made by a bullet.

The area covered in this inspection was in the general sidewalk area from the first to the second lamppost on the east side of Elm Street and just west of the intersection of Elm and Houston Streets. It is noted that the first lamppost is almost directly in line with the west end of the main multistoried building of the Texas School Book Depository building, while the second lamppost is almost directly in line with the western end of the one story building which is connected to the main Texas School Book Depository building.

It was noted that the sidewalk is made of concrete and the general texture of the sidewalk is rough.

No mark was located on the sidewalk in the general area of the first lamppost which would appear to have been made by a projectile.

In the area of the second lamppost, approximately thirty-three feet east of the post, in the sixth large cement square, four feet from the street curb and six feet from the parkside curbing, is an approximately four inches long by one-half inch wide dug-out scar, which could possibly have been made by some blunt-end type instrument or projectile. It is noted that this scar lies in such a direction that if it had been made by a bullet, it could not have come from the direction of the window the President's Commission on the Assassination of President KENNEDY has publicly stated was used by LEE HARVEY OSWALD when firing his assassination bullets at the late President.

2

This particular scar is in line with the western end of the multifloor section of the Texas School Book Depository building, that is, the opposite end of the building from where OSWALD was shooting at the President.

No other mark was found in the area of the second lamppost which might appear to have been made by a bullet.
