Dear Sylvia,

I don't get it. I don't know any of these people's names. For the last two months Berendt and I have been trying to run down all the films that were taken in Dealey Plaza. Some of the names we got from the Archives and others from the 26 volumes. I just turn the names over to Berendt when I find ~~them~~ them and he goes after them. Hence, even now I don't have the foggiest idea what film this guy is ~~talking about~~ talking about. Actually, I don't have much interest in the much vaunted puff of smoke if your informant thinks it appears in the Moerman photo also. Moerman is simultaneous with Z 310-311, hence a shot striking the President in the head at Z 313 would not even show. Weisberg is so sleppy -- it's embarrassing to the rest of us if he comes out with great fanfare and makes another blunder like the speed of Zapruder's camera. In any case whatever name this is -- I obviously didn't get it from you.

One question: Is the point about Oswald that he saw Norman et al out front before the assassination or that he saw Junior Jarman in the lunch room? I can verify the latter, but not the former.

Best luck, Sylvia,

T. J.
