Dear Sylvia,

This is an outstanding index -- I have some idea of the work that went into it because I helped prepare one for my other book last June. It's complete and very intelligently organized. My suggestions for changes, as you can see, are the smallest details and in certain cases may be quite beside the point.

As to Appendices: Clearly Appendix A should not be indexed. To do so would just junk up the index with a lot of extra names. Still, if we're mentioning someone in the index, we might as well include the page number on which he or ~~she~~ is listed in Appendix A. The green underlining denotes those people who are listed in Appendix A.

Preston's idea for an illustration index strikes me as an excellent idea upon reflection; it should aid the person who wants to use the book as a research tool. Maybe you and I working together can make a go of it. Let's talk about it.

And Sylvia -- your help on this is so appreciated. You've become already something of a legend around Geis's office. Thanks so very much.

See you soon old pal,

*with love,
Tina*
