3 Patients in Parkland Hoop  
(Texas State J of Medicine)

Dear Tink,

Welcome home! where I hope and assume you are, old pal. Here is a rare document which may interest you. Someone sent it to me and I have skimmed it, pending time for a closer reading. Interesting stuff on the occiput and right rear skull...let me know what you think.

Feel free to xerox a copy to keep but please return this one, I want to show it to a few other people.

Which reminds me: Bill O'Connell sent me two 7-inch reels of tape of his interview with you when you were on the coast, but I cannot play them because they are 7 ips speed and my tape recorders take only  $3/34$  and  $1/78$  (that should be 3 and  $3/4$  and 1 and  $7/8$ , I guess). If you like, I will send you the tapes in the hope that you have a tape recorder of the right speed accessible in the College. Let me know.

It's obvious from your postcards that you had a grand summer. Good! All the best,

As ever,
