Jan. 22, 1964

Chief Justice Earl Warren
Washington D. C.

I have yet to hear you retract the foul and venomous charge that you made close to Kennedy's casket that he was murdered by a rightist.

When it turned out that it was a dirty, filthy left winger of the same group you have defended so nobly in all of your decisions you never had the moral courage to publicly announce your mistake and to denounce your foul charges.

For you to be appointed to head the investigation of the murder is like sending a snake to investigate a killing by a hyena. How can you be fair when you have been on the Communist side all through your career. It would do justice a grand favor if you would resign from this committee and let the investigation be carried on fairly and above board.

NO!!

This is not the Platform of the Communist Party, but believe it or not on August 19 the official delegates of the Western States Conference (eleven states) of Young Democrats met in San Francisco and adopted resolutions which among other things approved the following:

1. Abolish the House Committee on Un-American Activities.
2. Recognize Castro's Cuba by the resumption of diplomatic relations and trade relations.
3. Resume travel and commercial relations with Red China.
4. Repeal the Internal Security Act which would be the equivalent of abolishing the United States Senate Committee on Internal Security.
5. Withdraw all troops fighting Communism in South Vietnam. (This would surrender this whole area to Communism).
6. Give full approval to the Black march on Washington.
7. Revise the Immigration laws. Revision advocated would be the equivalent of opening our shores to the invasion of millions of people inconsistent with our traditions.

A CHALLENGE

Every public official who calls himself a Democrat and every leader in the Democrat Party should be called on to repudiate these Resolutions which could not have been any worse if they had been adopted by the Communist Party.
