

Friday 8/25/72 11:30 am

Call to Cyril Wecht at his office

Was D.C. 2 full days

Dinner to Bud

Lifter in Pitts. Tuesday

In Archives Wed - lunch Lifter Smith

enemy Bud = " " Gary

Sprague Lesar

Mr. Johnson was decent

X-R = photos, dictated full description
of locations of fragments

Saw clothing etc. including Connolly X-Ray
rifl, score-book, bullets
frag etc.

11 page memo including

one of verbatim

"Morgan" — ?

stating SS seized 120 roll

film & exposed it

11/1/66

Asked re memo of transfer

11/26/65 re inventory

Was told "unavailable"

On photos significant things are

presumed entrance top of head
is high (could be exit)
no involvement of occipital scalp at all

so-called "object" is is there
below surface of top of brain
(no identifying features on
X-rays and photos)

more like parallelogram
dark grey / brown / black
shimmering effect

Could be piece of metal but
does not show on X-rays

Are we looking at authentic material?
from same person?

Might be some kind vascular tumor
concealed by surgeons in re

JFK good health

No evidence of wound at
Adam's apple, only pure
tracheostomy incision visible

The no one ever mentioned it
in any photo in left occipital
region at about x occip protuberance
in hairline is a small flap of
something $\frac{1}{4} \times \frac{1}{2}$ inch

Definitely could be little
inverted flap of scalp - maybe an
artifact -

On one photo, there is black line like a
thread, straight, from the post.
object upward to right side
- a black picture - ? -

Fantastic that this not mentioned
at all by Humes et al &
Clark Panel

left temporal area has contusions
& lacerations

- gives impression of a small hole -
could be base of a bullet showing
- small-caliber base of " -
But does not show on X-ray

Back wound not as low or as high
as claimed - is higher than
holes in coat & shirt

Saw 2 (perhaps 3) metal frags in
neck - quite small
Holding 399 in hand, despite preparation,
was still amazed by primitive
character of the bullet

What to do? Thought hard &
asked opinion - Concluded,
say 0 publicly now could be
dangerous policy - Other hand,
did not want detailed discussion
now -

On Sunday was article Detelined
Denver by Morgan (Jim Clark
Panel) reiterating panel findings

Did tell Burke Marshall in advance
planned go Archives

Concluded - re Fred Graham - Sunday
Times - decided give him pointer
for Sunday X & have
news conference in Pitts

Waiting for call from Graham news
- press conf. Saturday noon
Pointed out to Graham some
high lites - 1-bullet theory out
