

Dr Wecht Sunday 9/11/66 2:45 pm

- ① Omission of entry wound head
- ② Copper-jacketed bullet.
- ③ Faking of autopsy photos

Impression is view did not allow
evidence of entrance wound ~~etc~~

Possible to fake photos? Yes, can
take photos of anyone else's skull
Could be by tampering w originals
but more easily detected ① ② ③

Not at all difficult to come up
w different photos & pass them
off as JFK's.

Should have had non-military people
at the autopsy.

Is possible for no copper deposits
Should have subjected them to
neutron activation analysis
to milligrams of a fraction
& thus possible to determine
if come from a single bullet or
from a batch of "S"

After panel discussion

- 400 people there - gas for audience

One asked - he was a high up

FBI official - said essentially
no one can sue the FBI

(who were trying to " " " ?) - directed

Especially to the man who
gave talk on criminology (Indianer)

Osterburg much = apologetic to FBI

who pushed even more

Wedel pushed pt not pure

science can be + other one

valid interpretation in

any forensic sciences

Assoc = a particular org

can lead to heart in bias

& prejudice

FBI "expanded his remarks"

thought only trying to

get his name
