

Thanks for the Nichols article. I am in touch with him. Had a call from Al Chapman, Dallas today. Claims he has most of proof for catacomb access in area and will send. Says there was a place on the grassy knoll, manhole like, over which a car could park and hide it. Apparently Penn doesn't trust Chapman, from what Chapman says. Garrison is calling Liebler as a witness in the Andrews trial Wednesday, by subpoena if not voluntarily. Liebler said he had to consult an associate. Cracked record. Nothing else new. ^No developments in other things. I've been on phone to man of whom I wrote and perhaps that situation will improve. Interestingly enough, with all the present greater than average demand for FBI agents (riots, etc), the one sent to that area and doing the checking around is the same one who did the original whitewash. His technique is rough shadowing: not keeping his presence secret. He approached this man's mother-in-law, which is about as blatant as he could get.
