

Dr. Robert Bahmer

Dear Dr. Bahmer,

You will perhaps recall that some months ago, after I examined Commission Document 371 and found parts of it missing, you also instituted a search and reported to me that ~~this~~^{all} same ~~material~~ data ~~was~~^{were} not included in a duplicate file. By definition and testimony, the identical data ~~is~~^{are} part of Exhibit 397 but ~~was~~^{were} not printed as part of it, without explanation.

I now note that one of the Commission's former Counsel, Joseph Bell, in a public address and in a newspaper report said that with the film of the autopsy there ~~was~~^{were} returned to the archive "other medical data" ~~and that it was~~ recently placed under seal in the National Archives".

If ~~this~~^{this is} data ~~is~~^{are} part of the autopsy file, part of Exhibit 397, if ~~it~~^{part of it} included any of the autopsy notes ~~or other data~~, it should be available and I would like two Xeroxed copies ~~of it~~ at your earliest convenience.

If ~~it~~^{this} is data of a different sort or if Mr. Ball is in error, I should like to be informed of it.

Sincerely yours,

Unread thing on Jenner very valuable. Will read tonight. I am to meet with him and Bizer and Sauvage on a WOR special, Martha Dean show, next Wednesday, taping, to be aired two hours daytime Thursday. I am trying to get a transcript of the NET show for I'd heard he said what you say in the first item.

Thanks.

H
