

9/5/69

Dear Paul,

This morning I have a note from John pretty well eliminating him as the source of the leaks and enclosing copies of his letters to you on the Frazier testimony.

I have taken the liberty of writing both Sylvia and Cyril to see if they would like copies. As I told you, for it was certain, Sylvia does and offers to pay the cost of xeroxing and ~~a share of the collateral costs~~. I have asked this of Cyril, for otherwise too great a burden will fall on you. I am certain Bernabei will make the same offer, though I know he is temporarily stretched a bit.

I have asked John, if it entails no actual work for him, if he can, in addition to the xerox copy you will make, supply me with a Thermofax on Finck. This takes up so much less space in an attache case it offsets the disadvantages of impermanence and lack of clarity. I am hoping the lecture bureau will hook me and I will want a travel copy, not only for use in lectures but because I invariably work on planes. If he cannot, I would very much appreciate a second copy of Finck, for this purpose. If you can do it, is it possible to make this one copy on thin paper?

Eventually, I believe we will be able to get other transcripts. I will keep you posted. I have asked about Shaneyfelt.

I do not know when I can type my Frazier notes. I shall try as soon as I have completed correcting the current work, for my wife will not have time. This is an enormous typing job.

When it is done I'll be asking you if you want to xerox a copy? It is entirely on Ray/King. Present indications are it will run about 350 legal pages. If you can make up your mind without reading it, let me know. I believe it possible Gary and Dick will also want copies, for they are both interested in that case.

Nothing else new.

Best,
