

5/22-There is one of those Carr letters I would like to use, the one where he talks about the investigation of LHO's possible fed. connections. I don't have that one, I'd like to read all of it, and with this submission, I'd like to include a copy of everything I quote, Media having done to the media what it did. As I work some of this stuff over, some of the things I've never had a chance to tell you about, two things are becoming more clear, aside from higher probability that it was true: I have always felt Rankin was the bastard responsible for most, the boxer-inner of the weak others, and now I am without doubt; and there was even more inside dirty work than even I had suspected, and my suspicions were pronounced. When I have the draft done you'll understand this better, but not to be talked about, there were sessions of which we'd had no knowledge. Nice little things like that. And, although I felt I needed none for my own satisfaction, I now have what others have missed, what I regard as the proof that they do not let me have the spectro because it is exculpatory. I have this in different form now that I think means nothing else. But proves it was known to the non-innocent. Hurriedly, HW
