Dear Mrs. Margraf,

The "Standard"
Outdoors (L.A. Free Press
of August 8) contains
statements.

The unadvised
position of Mr. Dyer in
this case seems most
bizarre.

Of us parents you
Subam was IBA in-
strument of a computer
or IBA's school of Robert
Kaiser, out of IBA
Programming student, R.F.K.
Must Die.

But Computers
and Automation will
conquer dystopia and
warrior systems.

Optic 000, but
force what's wrong
one answer.

Only report "to"
watching IBA trust
will be dead.

In report, partners
are prepared to
reality. And work.

Summary,

David P. Williams
