Dear Susbua,

Yes, Legend was deplorable but given E.N.E.'s belief that "the only question -- what's exploding was h.H.O.'s motive in defecting ---", what other conclusion could E.N.E. draw since his primary source was The CIA Oral Guard - Angleton and Company. How he can imply that De Morkom's request may be K.G.B. is typical.

Quite an absurd book but quite on the level of his earlier articles "proving" that the Pentagon Papers did not really show deceit.

Many of the N.F.K. mysteries can be cleared up by the appropriate

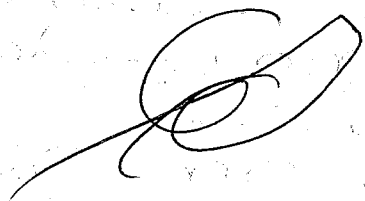

scientific tests. Authentication
of the autopsy data is
crucial. This causal and
wharred have already been
done.

One can only wait
but I share your skepticism
as regards The House Select
Committee.

We are all fine
and quite enjoy it
here.

Have a wonderful
trip and keep in
touch.

Sincerely

R. R. I.
