

4/14/81

Dear Sylvia,

Thank you for your kind and checking letter.

I suppose we all have details on the yellow brick road of life but, for whatever reason, the weather do appear to wander off the path rather frequently.

I was told that Dick Barnard died from a fall on the ice although he had been very ill with a nervous condition before the accident. Tragic!

The general critique of "Accessories returns" like a "substitute" to deliver a package even after the H.S.C.A. "Report". The contradictions between Paralamat, Bethesda, The Panel Review, Weart's analysis, and The House Autopsy Review were not even addressed. To accept The H.S.C.A./W.C. theory we must conclude that The Paralamat Personnel, the witnesses, The Initial F.B.I./Secret Service/N.P.I.C. Reconstruction of the shooting were all wrong and The Zapruder film was an illusion. We must mysteriously

accept attack, many attack
unlikely conclusions or
accept the possibility of
a bogus and dated actual
autopsy. The latter seems
likely.

No tests were even
performed by The H.S.C.A.
to resolve if a Bullet
could do what The
"Magic Bullet" did do.

I suppose the fact
that Oswald's Mother
dated an associate of
Marcello somewhat prior
to her son's culpability.
All evidence to the
effect that "The Mob
Hit Kennedy" was lifted
from Scott, Hayes, Galt,
Garrison etc. and as
Fonzi had demonstrated
no fiscal investigation
was ever carried out.

Thus, the last two non-
investigations by The H.S.C.A!
They even classified their
data, make them The U.C.
deal!

Huston's theory is absurd.
Why not root R.F.K. from
one direction, make half the
population is better than
have the Secret Service stop
the body for "repairs". Or
why allow Parkland to
examine the body before
"repairs". Why would a
 bunch of civil servants do
all this? Can you
imagine Grant, Kellerman

et. al performing "the switch"
like Ramali? Does Highton
believe this stuff?

I do hope that you
are feeling better after
the loss of your friend.

Do keep in touch.
We happy(?) few must
stay together.

Always,
